

A Few Housekeeping Notes!

Fire Announcement:

Please do note that we are required by RI law to play our fire announcement before each show. I can either email it ahead of time separately or I can have my head audio pass it along to the audio department via flash drive during load in/prior to showtime.

Fire Suppression Systems:

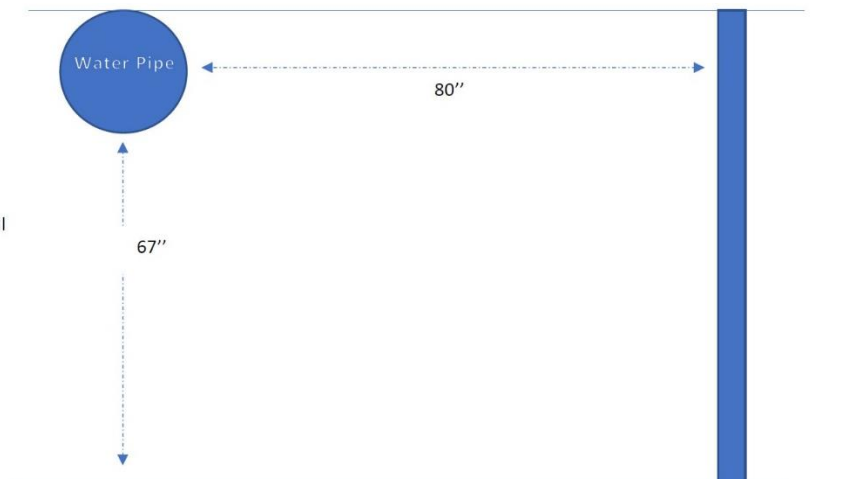

We do have a fire apparatus/deluge system control midstage left, up against the wall and will need to keep an aisle clear of road cases, chairs, props, etc. We've had a few near misses of dumping the deluge system because costumes have been hung on the apparatus itself, and have set the alarms off. Please pass this info along to all actors, dancers, departments, etc. Please see the map below.

Basement Storage:

We are able to store some road cases in our basement storage area. Please be aware there is a drain pipe that limits the height of four cases that pass through this area.
